

University of Illinois at Springfield

Graduate Certificate in Business Process Management

Program Description

The Certificate in Business Process Management provides information systems practitioners with the fundamental knowledge needed to be able to successfully analyze, define, and design organizational processes and to effectively apply information technology to these processes. This certificate is awarded upon completion of the required coursework. Individuals may work on the certificate part time without being formally enrolled in a degree program, or may complete it as part of the master's of science degree in Management Information Systems.

Admission Requirements

Students must hold a baccalaureate degree from an accredited institution and meet campus requirements for admission to graduate study. Candidates for the certificate will be expected to complete course requirements with a grade of B or better.

Degree Requirements

The Graduate Certificate in Business Analytics includes the following required courses.

MIS 513: Management Information Systems (3)

MIS 567: Business Process Modeling and IT Governance (3)

MIS 568: Business Process Management and Process Mining (3)

Important Notes:

1. If MIS 513 has been taken as part of another MIS graduate certificate, the student must substitute another UIS Management Information Systems course, not included as a required course in another certificate, in its place.

2. MBA students can replace MIS 513 with MIS 525.
